### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The claimed invention is directed to non-statutory subject matter. Claim 1 claims "placed beyond said remaining stub" which is positively claims the stub which is non-statutory subject matter. Suggested language, --configured to be placed beyond said remaining stub--.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3, "at least one activating drive" is ambiguous. Is this a new element? The upper and lower actuating drives do not connect to the pivot head.

Claims 15, "said outer supple cover" lacks antecedent basis.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3738

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-11, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bashore (319,776).

Bashore teaches an articulated finger assembly adapted to be operated by a remaining stub of an amputated finger, said artificial finger includes a stationary matrix (x) placed beyond said remaining stub, a lower actuating drive including (H, I, K) being pivotally attached to said stationary matrix and an upper actuating drive (G) being pivotally attached to said stationary matrix, said upper and lower drives are reciprocally and transversely interconnected to a pivoting block (L), in a pivoting fashion, thereby and forming a first articulating knuckle segment.

The pivot head is interpreted as the outer casing of elements P and L.

The extension is element O.

Outer and inner phalangeal sections are self evident.

The fastening means, see at least element B.

Claim 14, see element D.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3738

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bashore (319,776) in view of Rincoe (5,062,855).

Bashore teaches the artificial finger as described above, however, fails to teach a supple cover. Rincoe teaches using a supple cover 58 over an artificial finger. It would have been obvious to one having ordinary skill in the art to have utilized the supple cover of Rincoe with the finger of Bashore to give a more natural and anatomical appearance.

***Allowable Subject Matter***

Claims 5-6, 13, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and correction of the 101 rejection.
